Dear Sir/Madam,

I am interested in joining your team in the position of Laravel / VueJS Developer'. I am in the final year of my bachelor's studies at WSB Merito in Gdańsk, and I expect to graduate in October 2023. My bachelor's work is based on the application for tracking the route for couriers. using Flutter on the frontend side and Django on the backend.

In total, I have about 3 years of professional experience as a Laravel and Vue Developer in 3 different companies, which demands from me high flexibility to adjust to the project and new environment and work-flow.

I have worked on various projects that have helped me gain hands-on experience in developing advanced websites for accounting, company sites, and shops, like Media Expert or Indiana. I have also worked in the field of health care and together with a team of other developers we created an app, which was helping to monitor and keep in order amount of people visiting the hospital. Beyond that, I am also familiar with Symfony on the Back-end, jQuery on the Front-end, and the beginning level of administration of the server because of deploying changes or setting whole servers for multiple Laravel applications on it.

In my career, I have extensively used PHP with mostly Laravel framework, and sometimes Symfony or WordPress, JavaScript with Vue, and jQuery. My areas of interest are backend development with managing REST API connections, creating advanced e-commerce features for the shops, and preparing server environments for ready-to-deploy applications. I enjoy problem-solving and am genuinely interested in joining your organization.

As a performance-driven and forward-thinking professional, I welcome the opportunity to meet with you to discuss my experience, skills, and education. Thank you for your time and consideration, and I look forward to hearing from you soon.

If you have any questions, please feel free to contact me via e-mail at kamillsocha2000@gmail.com, or by phone at +48 791947481.
